

# PGE Stabiliser for TV

## Power Backup + Protection

Give Protection from Power impurities.  
Save your work & equipment when Power goes.

The Electronic voltage regulator is designed to protect sensitive electronic equipments like, LCD/LED TVs up to 42", set top box, Music Systems, DVD Players, Xbox, PS2, Laptops, Home Computer, Monitor, Modems, Data Processing Equipment, Inkjet Printer, Scanner, Fax, etc.

- Provides stable output voltage through 2-boost and buck stabilizer
- Accepts wide input voltage range from 120V-300V
- 2 time delay selector protects the precious electronics against any consecutive starts.

| Model                        | PGE600                                       |
|------------------------------|--|
| Power Capacity               | 230V, 2A/ 300W                               |
| Input Voltage Range          | 120 - 300 V & 140-300V selectable            |
| Output Voltage Range         | 200 - 240V (I/P V 170-280V)                  |
| Time Delay                   | 120-300V, 3 sec or 140-300V, 0 ms for PC use |
| Output Frequency             | 50 Hz & follows input                        |
| Surge & Lightning protection | 320J, 7000A                                  |
| Spike & Noise protection     | Elementary filter included                   |
| Mounting Position            | Wall mount & desktop                         |
| Dimension (DxWxH)            | 248 x 90 x 88 mm                             |
| Output sockets               | 3 x Indian 5 pin, sockets                    |
| Color                        | Black  |
| Application                  | LCD/LED TV upto 42", Set Top box, DVD Player |
